

Quick and Dirty Instructions for the New ACM Typesetting Format—acmart Class

Rasit Eskicioglu
the “*Resident*” Publication Chair
for SENSYS and BUILDSYS and their Workshops

Preamble

ACM has recently adopted a unified format (`acmart.cls`) for its publications. This new format has several important changes that might confuse particularly those of us in the SENSYS and BUILDSYS communities and in their affiliated workshops, who have been accustomed to the old (slightly modified) `sig-alternate.cls` style. The new comers to the communities should have no problem using it, as it will be just a template to use. One such change is that all ACM conference proceedings are now using 9pt fonts for the main text. This package uses free packages and fonts available in all major \TeX distributions (\TeX Live, Mik \TeX , Mac \TeX) 2015 and later. If you have older distributions your documents will have incorrect fonts.

Important Rules

1. The preferred format is \LaTeX . If you are not an avid \LaTeX user, you can use the new Word format, but make sure to read the User Guide (1) carefully, and install the new Linbiolinum and LinLiberte fonts that comes with the package.
2. Read the User Guide (1). Read it again.
3. Do not change anything in the `acmart.cls` file.
4. Do not change any length, such as `\textlength`, `\textheight`, or any margin in the body of your paper.
5. Look at the `sample-sigconf.tex` and create your own with all of the information and include the body of your manuscript at the end.

Top Matter

The details are in the User Guide (1) (pages 8–9), but I want to emphasize the fact that ACM discourages the use of the “merged” authors block, such as shown below:

```
Ben Trovato G.K.M. Tobin Lars Thörvöld
Institute for Clarity in Documentation, P.O. Box 1212, Dublin, Ohio, 43017-6221
{trovato,tobin,lars}@corporation.com
```

Instead, use a separate `\affiliation` for each author to generate the following, instead:

Ben Trovato Institute for Clarity in Documentation P.O. Box 1212 Dublin, Ohio 43017-6221 trovato@corporation.com	G.K.M. Tobin Institute for Clarity in Documentation P.O. Box 1212 Dublin, Ohio 43017-6221 webmaster@marysville-ohio.com	Lars Thörvöld The Thörvöld Group 1 Thörvöld Circle Hekla, Iceland larst@affiliation.org
--	---	---

The title block of each paper (regular, short papers and abstracts alike) is followed by four blocks:

ABSTRACT

This paper provides a sample of a \LaTeX document which conforms, somewhat loosely, to the formatting guidelines for ACM SIG Proceedings¹.

CCS CONCEPTS

• **Computer systems organization** → **Embedded systems**; *Redundancy*; Robotics; • **Networks** → Network reliability;

KEYWORDS

ACM proceedings, \LaTeX , text tagging

ACM Reference format:

Ben Trovato, G.K.M. Tobin, Lars Thorväld, Lawrence P. Leipuner, Sean Fogarty, Charles Palmer, John Smith, and Julius P. Kumquat. 2017. SIG Proceedings Paper in LaTeX Format—This is a Very Long Title That will not Fit in One Line. In *Proceedings of The 8th ACM/IEEE International Conference on Cyber-Physical Systems, Pittsburgh, PA USA, April 2017 (ICCPs)*, 4 pages. DOI: 10.475/123_4

1 INTRODUCTION

The *proceedings* are the records of a conference². ACM seeks to give these conference by-products a uniform, high-quality appearance. To do this, ACM has some rigid requirements for the format of the proceedings documents: there is a specified format (balanced double columns), a specified set of fonts (Arial or Helvetica and Times Roman) in certain specified sizes, a specified live area, centered on the page, specified size of margins, specified column width and gutter size.

2 THE BODY OF THE PAPER

Typically, the body of a paper is organized into a hierarchical structure, with numbered or unnumbered headings for sections, subsections, sub-subsections, and even smaller sections. The command `\section` that precedes this paragraph is part of such a hierarchy³. \LaTeX handles the numbering and placement of these headings for you, when you use the appropriate heading commands around the titles of the headings. If you want a sub-subsection or smaller part to be unnumbered in your output, simply append an asterisk

Once you complete the permissions proceed with ACM, the information you receive in a second email will contain:

```
\copyrightyear{2017}
\setcopyright{acmcopyright}
\acmConference[Sensys'17]{November 6--8 2017, Delft, The Netherlands}
\acmISBN{978-1-xxxx-xxxx-x/17/11}\acmPrice{\$15.00}
\acmDOI{http://dx.doi.org/xx.xxxx/xxxxxxx.xxxxxxx}
```

Author Anonymity

In most conferences, submission are reviewed by using either **blind** (reviewers are hidden from the authors) or **double blind** (reviewers don't know the identity of the author(s), and the author(s) don't know the identity of the reviewers) policies.

The authors may use anonymous option to hide their identity:

SIG Proceedings Paper in LaTeX Format—This is a Very Long Title That will not Fit in One Line*

Extended Abstract[†]

Anonymous Author(s)

ABSTRACT

This paper provides a sample of a \LaTeX document which conforms, somewhat loosely, to the formatting guidelines for ACM SIG Proceedings¹.

the titles of the headings. If you want a sub-subsection or smaller part to be unnumbered in your output, simply append an asterisk to the command name. Examples of both numbered and unnumbered headings will appear throughout the balance of this sample document.

Sometimes, the manuscript may include information identifying its authors. In this case `anonsuppress` environment can be used. For example, the text below can be hidden when the environment is used with anonymous option:

```
\begin{anonsuppress}
This work is continuation of Dr. Trovato and his team at
\textit{Institute for Clarity in Documentation}. This paragraph will
disappear when \texttt{anonymous} option is used.
\end{anonsuppress}

ABSTRACT

This paper provides a sample of a LaTeX document which conforms, somewhat loosely, to the formatting guidelines for ACM SIG Proceedings¹.

CCS CONCEPTS

• **Computer systems organization** → **Embedded systems**; *Redundancy*; Robotics; • **Networks** → Network reliability;

KEYWORDS

ACM proceedings, LaTeX, text tagging

ACM Reference format:

Ben Trovato, G.K.M. Tobin, Lars Thørvæld, Lawrence P. Leipuner, Sean

1 INTRODUCTION

The *proceedings* are the records of a conference². ACM seeks to give these conference by-products a uniform, high-quality appearance. To do this, ACM has some rigid requirements for the format of the proceedings documents: there is a specified format (balanced double columns), a specified set of fonts (Arial or Helvetica and Times Roman) in certain specified sizes, a specified live area, centered on the page, specified size of margins, specified column width and gutter size.

This work is continuation of Dr. Trovato and his team at *Institute for Clarity in Documentation*. This paragraph will disappear when anonymous option is used.

2 THE BODY OF THE PAPER

Sample Driver

The following is a minimal **driver** file for your manuscript:

```
\documentclass[sigconf]{acmart}

\usepackage{balance} % For balanced columns on the last page

\setcopyright{acmcopyright} % if you give the rights to ACM
\acmDOI{...} % DOI - Insert your DOI below...
\acmISBN{...} % ISBN - Insert your conference/workshop's ISBN below...
\acmYear{2017} % Insert Publication year
\copyrightyear{2017} % Insert Copyright year (typically the same as above)
\acmPrice{15.00}
\acmConference[Short Name][Long Name]{dates}{venue}

\begin{document}
\title[Short Title][Long Title for Your ACM Conference Paper]
\begin{abstract}
...
\end{abstract}
...
```

```

...
\begin{CCSXML}
<ccs2012>
  <concept>
    <concept_id>10010520.10010553.10010562</concept_id>
    <concept_desc>Computer systems organization~Embedded systems</concept_desc>
    <concept_significance>500</concept_significance>
  </concept>
  ...
\end{CCSXML}

\ccsdesc[500]{Computer systems organization~Embedded systems}
...

\keywords{ACM proceedings, \LaTeX, text tagging}

\maketitle
\input{body-of-your-manuscript}

\balance
\bibliographystyle{ACM-Reference-Format}
\bibliography{name-of-your-bib-file}

\end{document}

```

The `\terms` is now replaced by the **CCS CONCEPTS**. You should generate the CCSXML code with the tool at <http://dl.acm.org/ccs.cfm> and copy and paste it in your “driver” file.

Please note that you may need to put the `\balance` towards the end of the `body-of-your-manuscript` file.

Running Headers

One of the changes in the new style is the “running heads”. There are two potential ugliness with this.

ICCP, Sep 2017, Bristol, UK, Lisa Thörvald, Lawrence P. Leipuner, Sean Fogarty, Charles Palmer, John Smith, and Julius P. Kumquat

command `\textit`; boldening with the command `\textbf` and typewriter-style (for instance, for computer code) with `\texttt`. But remember, you do not have to indicate `typestyle` changes when such changes are part of the *structural* elements of your article:

Table 1: Frequency of Special Characters

Non-English or Math	Frequency	Comments
---------------------	-----------	----------

To avoid this problem, use one of the following `\acmConference`, for `SENSYS` and `BUILDSYS`, respectively:

```

\acmConference[SenSys]{The 15th ACM Conference on Embedded Networked Sensor Systems}{November 6-8, 2017}{Delft, The Netherlands}

\acmConference[BuildSys]{The 4th International Conference on Systems for Energy-Efficient Built Environments}{November 8-9, 2017}{Delft, The Netherlands}

```

Further, if you have a long title, use the optional *ShortTitle* in the `\title`. Ideally, if your title is wider than a column width, it should be shortened.

```

\title[SIG Proceedings Paper in LaTeX Format]{SIG Proceedings Paper in LaTeX Format---This is a Very Long Title That will not Fit in One Line}

```
